Risks of Posting TRAVEL PLANS

DANGERS

THINK BEFORE YOU TAKE OFF... AND BEFORE YOU POST!

BURGLARY RISKS

- Criminals may see that your home is empty and unguarded.

LOCATION-TRACKING OR STALKING

- Real-time updates can reveal where you currently are and strangers can not only track your movements but they could also predict where you'll be next.

IDENTITY THEFT

- Boarding passes, passports, ID's, bookings

  Sharing photos of these can be used to hack into your accounts and steal your identity.

OVERSHARING PERSONAL INFORMATION

- Posting your itinerary, flight schedule, or daily vacation updates
- Your routines, habits, and information

DIGITAL RESPONSIBILITY

THINK BEFORE YOU POST

Wait until after your trip to share travel photos, videos, or itinerary.

Avoid posting boarding passes or any travel documents.

SECURE YOUR DIGITAL DEVICES

Use strong, unique passwords and enable your two-factor authentication; lock your phones and other devices.

LIMIT LOCATION SHARING

Don't always share where you are or turn off geo-tagging because whenever you post, it automatically tags your location in some apps.

Review app permissions frequently; restrict which apps can track your location.

USE SECURE NETWORKS

Use a VPN, especially on public Wifi; avoid sensitive transactions (like banking) on untrusted hotspots.

Oversharing your vacation can lead to more than just "likes" - it can compromise your home security, personal identity, and long-term privacy.
